DETAILED ACTION

Status of the Claims

1. The Office acknowledges receipt of Applicants Response; dated 21 January 2003, paper number 9. Applicant has cancelled claims 21 and 22, and amended claims 1-20. Claims 1-20 are pending, and are examined in the instant action.
2. The effective filing date for this case is the PCT filing date, 14 October 1999. Benefit of foreign priority requires that the priority document or a certified English translation be submitted. Applicant has traversed this stating that the priority document, ZA 98/9427 (filing date 15 October 1998) was filed under Rule 17.2 PCT, with the International Bureau. The Office maintains that the effective filing date for this case is the PCT filing date, 14 October 1999, and that until such time as the priority document, a certified English translation of the document, or a copy of the document, is received, Applicant shall have the benefit of the PCT filing date. See 35 USC 365 (a), (b), and 35 USC 119 (b)(1) and (3).
3. This action is made FINAL necessitated by Applicant's amendment.
4. All rejections not addressed below have been withdrawn.
5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112, second paragraph

6. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, recites "gene". Claims which recite "gene" are unclear because a "gene" implies a DNA sequence that exists in nature and includes coding and noncoding regions, as well as all regulatory sequences associated with expression. All recitations of this language are also rejected. In claim 1, suggested language is "an Agrobacterium stain comprising a DNA of interest, thereby genetically modifying the plant seed".

In claim 5, "it" lacks antecedent basis; is "it" vacuum infiltration" or "seed" or something else?

Claim 12 recites "gene". Claims which recite "gene" are unclear because a "gene" implies a DNA sequence that exists in nature and includes coding and noncoding regions, as well as all regulatory sequences associated with expression. All recitations of this language are also rejected. Also, "a selection agent resistance DNA" is not clear; does this mean that the DNA is resistant? Suggested language is "DNA of interest and DNA comprising a selectable marker, the DNA comprising a selectable marker also". It is also suggested that all recitations of "a selection agent resistance DNA" be similarly clarified.

In claim 14, "GUS-intron" is unclear because this implies that the intron is part of GUS, which it not the case, as GUS is a bacterial coding sequence, and bacterial

coding sequences do not naturally contain introns. Suggested language is "GUS coding sequence comprising an intron".

Claim Rejections - 35 USC § 102

7. Claims 1-9, 12, 13, 14, and 19-20 remain rejected under 35 U.S.C. 102(b) as being anticipated by Clough et al, 1998, Plant Journal, Vol 16, No. 6, pages 735-743. (Applicant's IDS)

Clough teaches a method of obtaining transformed seed by contacting germinating plant seed with a wetting agent and Agrobacterium (Summary, p 735), an Agrobacterium and wetting agent admixture (Figure 2, p 738, and Table 3, p 739), vacuum infiltration (Table 1, p737), a contact period of 24 hours, and a temperature of 24 degrees C, Agrobacterium tumefaciens (Abstract), a foreign gene comprising a resistance gene (p 741, 1st column, last sentence), plant seed, plants, and progeny (Table 3, p 739).

Accordingly Clough anticipates the claimed invention.

8. Applicant traverses, stating primarily that the priority document, ZA 98/9427 (filing date 15 October 1998) was filed under Rule 17.2 PCT, with the International Bureau. And that thus the Clough reference is obviated as a reference. The Office maintains that the effective filing date for this case is the PCT filing date, 14 October

1999, and that until such time as the priority document or a certified English translation is received, Applicant shall have the benefit of the PCT filing date. See (2) supra.

Remarks

9. No claim is allowed.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
